

Greetings from the National STEM Association (NSA) of Malaysia. It is indeed a great privilege to be given this opportunity to pen a message to the St Anthony's Schools at Teluk Intan and Langkap.

National STEM Association (NSA) was established with the objective of promoting and attracting interest from all levels of the community in the field of Science, Technology, Engineering, and Mathematics (STEM). I am very happy to note that the St Anthony's School Old Boys Association (The St Anthony's School Alumni Teluk Intan – Kuala Lumpur) has taken this noble initiative to bring the online STEM Education to the secondary and both the primary schools. It must be applauded. Congratulations to all the three St Anthony's Schools!

Quality education is undoubtedly one of the strongest pillar that contribute to an individual growth and success. On this note, I am sure the Online STEM education by the St Anthony's School Alumni will cultivate interest and give a better understanding about STEM amongst the students and hope this will encourage innovation and STEM creativity in the classroom through projects and activities based on smart and interactive learning.

I believe STEM education will foster better analytical thinking, inquiring minds, logical reasoning and collaborative skills amongst the students and prepare them to the pressing challenges facing our world today in whatever role they take on in the near future.

National STEM Association organises various smart and interactive learning activities and we welcome all of you to join us and be a part of the association.

Professor Emeritus Dato' Dr Noraini Idris
President
National STEM Association
